The Doe Guideline states that the SMP "must strike a balance between imposing regulatory powers for the benefit of the community at large and the rights of the individual property owners." The rights of the individual property owners and their input have not been considered throughout this entire process. The property owners have been presenting public comment and writing letters for two years, only to fall upon totally deaf ears. We have repeatedly requested implementation of SSB 5451, which was unanimously passed by our representatives in Olympia and supported by the Pro Environment Community. We presented 10076 signatures asking for this, with absolutely no recognition from the council and had a peaceful march of several hundred shoreline home owners. The City Council is suppose to be a representative process. You are to listen to the entire community and act on their behalf. Which has not been done. You were not elected to implement your own opinions. The only reason that you have put forth to not implement SSB 5451 is that you personally feel that it is not needed. In saying this you are saying that your personal opinion is right and all or these other entities are wrong. You have totally failed as City Council Representatives.

I certainly hope you will spend some introspective time looking at your role as City Council Representative, how you have failed and how you might act in the future. You still have time to implement SSB 5451 and I ask that you represent the people as you were elected to do and implement SSB5451.
