Subject: Shoreline Master Program

I am a shoreline homeowner who missed the planning sessions for the SMP. While I have some concerns and have made a comment, I recognize I don't fully understand the plan. I am very eager to understand the facts of the SMP and how it will impact my property at 10191 N.E. South Beach.

I have tried to read the most recent version of the SMP plan and found it opaque and hard to understand. Most people I've talked with don't fully understand it either. I have read the Shoreline Homeowners Association summary of the plan and I recognize that they have a distinct point of view.

Is there a simple "Executive Summary" of the proposed SMP available that will simply and clearly describe the rationale and guidelines for the plan? Accessible and clearly presented information could go a long way toward combatting the current hyperbole.

Many thanks.

Ellen
