City Seeks Input on Waterfront Park, City Dock

BAINBRIDGE ISLAND, July 12, 2013 – The City has launched a survey for citizens to provide input on the potential uses and structures at the Waterfront Park and City Dock. The survey questions were developed from the conversations at the June 1 and June 30 community meetings. Responses will help the City determine the types of uses and activities the park and dock should support into the future.

“We appreciate and encourage residents to take this short survey to ensure that we receive as many contributions as possible,” said Associate Planner and Project Lead Heather Beckmann.

The survey is available [online](#), with hard copies available at City Hall. The deadline for responses is 4 pm, Monday, August 12.
