

NARRATIVE

I spoke to D1 about the cause of the collision. D1 stated he came into the curve from Eagle Harbor DR to Wyatt Way with a little too much speed, and after attempting to brake, the rear end of his car lost traction. D1 stated his tires needed to be replaced but he could not currently afford to do so. D1 stated he started to travel into the oncoming lane of traffic, and sharply turned the wheel to avoid a collision. D1 stated this over-correction caused his vehicle to understeer off the roadway and into a ditch. D1 explained that his vehicle initially appeared to rest in the ditch, but then pitched forward and rolled onto the roof.

D1 stated he was uninjured and declined medical aid. D1 stated he was wearing his seatbelt during the collision.

The evidence at the scene corroborated D1's account of the collision.
