

NARRATIVE

Vehicle #1 was southbound on Fletcher Bay Road and performed a left-hand turn onto eastbound High School Road. During the turn the back end lost traction and yawed in a counterclockwise rotation. Vehicle #1 impacted into the center, driver's side trailer. Driver of #1 was uninjured.

Vehicle #2 was a Pepsi delivery tractor/trailer that was stopped at the stop sign preparing to turn onto Fletcher Bay when it was struck by #1. The driver of #2 told me that vehicle #1 "came into the turn way too hot" which was borne out by the aftermath.

The collision case #1 to become wedged under the trailer. The truck would not start and the owner requested Kitsap Towing to respond.

Both drivers were given a driver's exchange form and the driver of vehicle #1 was issued and NOI for speed too fast for existing conditions.
