

NARRATIVE

At approximately 18:48 on 03/02/2025 I was dispatched by CENCOM for a report of a non injury collision involving a vehicle into a utility pole near the intersection of Springridge Ln NE and Hansen Rd NE. Upon my arrival on scene, I discovered the vehicle, driver, and the driver's parents on scene. The location of the collision was actually closer to the intersection of Springridge Ln NE and Wild Cherry Ln.

I spoke with the driver, [REDACTED], who advised he had been driving north on Springridge Ln and had briefly looked down to look at his phone, at which point he had driven slightly eastward off of the roadway and struck a utility pole with the front passenger side of the vehicle. The numbers on the utility pole were: A1672099, 623835, and 157242. There was noticeable damage to the exterior surface of the pole, but the pole otherwise to be intact and structurally sound. I also noted that the "blind spot" mirror mounted to the pole had been cracked, but I could not confirm whether the damage to the mirror had been caused by this collision or a previous collision, as there was no freshly fallen glass from the blind spot mirror.

The driver was cited for inattentive driving. The vehicle was towed by Kitsap to their impound lot due to the vehicle blocking the roadway and being unable to be driven due to apparent leaks from under the hood.
