

NARRATIVE

On March 10, 2025, at approximately 1350 hours, I was dispatched to the area of the Agate Pass Bridge on a report of a multi-car rear end accident. Prior to my arrival Officer Bothe arrived and moved the three cars to the park at Alma Place (Rotary Gateway Park) Information gathered showed that vehicles 2 and 3 were slowed/stopped on the bridge. Vehicle #1 was unable to stop to avoid colliding with vehicle 2 which was pushed into number 3. The damage to the three vehicles indicating a low-speed collision. The passenger side air bag housing in vehicle # 3 appeared damaged. That cost to repair/replace of the air bag is an expensive endeavor. All parties were given the case number to this incident and referred to their insurance company.
