

## NARRATIVE

Vehicle #1 was northbound on Ericksen Ave, when approaching Vehicle #2 it moved left of center into the southbound lane of Ericksen Ave. Driver of Vehicle #2 told me that he saw this and slowed/stopped his truck thinking the driver would move back into their lane, they did not. The driver of #2 said that it appeared to him that the driver of #1 was not awake. After the collision driver number #1 woke up, asked driver #2 to not call the police, backed up her car and left northbound. Driver # 2 added that based on the interaction with driver #1 and physical characteristics he thought that she was intoxicated.

The witness told me that he was north of the location at the time of the impact, walking southbound on the sidewalk. As he came abreast of the accident scene he saw that the female driving Vehicle #1 was a heavy set white female in her mid 40's. (Driver #2 provided a similar description) The witness jotted down Vehicle #1's rear plate as it left northbound from the scene.

While examining the scene I saw the debris from the collision was confined to the southbound lane indicating the impact was from the left of center vehicle.
