

NARRATIVE

I received a call for a collision investigation with a reckless driver on Point White Dr. at around 1212hrs. I called the RP and he stated that the incident occurred the evening of 08-26-22, stating his son was injured in a bicycle vs mailbox collision.

I arrived at the residence to speak w/ the involved JV. He stated he was riding home from a friend's house the night prior and a dark colored sedan was traveling SB at a high rate of speed and partially crossed over the centerline towards him and the cyclist swerved out of the center of the NB roadway, he then looked forward and saw a mailbox and crashed into the mailbox. He walked the rest of the way home since the brake line to his bicycle was cut from the impact.

I took photos of the JV's injuries other than some scratching on his hip that was covered by his clothing, and a chipped tooth. I took photos of the bike and the cut brake line. The JV was wearing a helmet and it appears damaged, photos were taken.

The JV's father requested a police report due to the nature of his son's injuries.

There was no collision between the bicycle and the unknown vehicle. There is no information to follow up on with the vehicle in question. I have reported all info that the victim and his father have told me. No calls were made to 911 at the time of the incident and there were no other known witnesses. The mailbox owner was advised of the impact but the mailbox sustained minor scrapes.
