

NARRATIVE

On 01/13/2022 at approximately 0702hrs, CENCOM received a report of an unknown injury collision in the area of Koura Rd and Meadowmeer Cir. The reporting party stated it was a white Honda civic which was in the ditch.

I arrived at approximately 0707hrs and contacted Driver 1. Driver 1 stated there was a large vehicle coming up the hill in the opposite direction with very bright lights. Driver 1 said he moved to the right to give the vehicle more room and drove slightly off the roadway and could not correct the direction of the vehicle. Vehicle 1 slid off the roadway and down the embankment striking a tree which stopped its momentum.

Kitsap Tow came and pulled the vehicle up the embankment and took it to the tow yard at the owners request.
