

NARRATIVE

On 07/24/2022 at approximately 2014hrs, CENCOM received multiple reports of a rollover collision in the area of SR305 and Reitan Rd. While enroute, CENCOM upgraded the accident to an injury collision.

When I arrived on scene, driver 1 was being attended to by BIFD and was not able to ask him any questions, as he was holding a bloody bandage to his head and his medical needs outweighed the accident. BIFD and I did not smell any alcohol coming from Driver 1.

Witness 1 was driving North on SR305 directly behind Vehicle 1. Witness 1 said vehicle 1 and witness 1 were traveling north at approximately 50mph, when vehicle 1 left the roadway prior to the intersection with Reitan Rd. Vehicle one drove through the ditch to where the culvert going under Reitan Rd, struck the culvert, which caused vehicle 1 to cartwheel in the air and land on the north side of Reitan Rd, strike and uproot the stop sign, and end up with the rear of the vehicle on the north side and resting on its right side.

Driver 1 was able to climb out of the vehicle and had a cut on his forehead which good Samaritans assisted with caring for until BIFD arrived.

Looking in vehicle 1 the drivers seat seatbelt was locked in the retracted position which indicated it was not used prior to the collision.

Driver 1 was transported to St. Michaels in Silverdale, WA.

Vehicle 1 was impounded by Kitsap Tow because the owner was transported to the hospital.
