

## NARRATIVE

On 03/01/2022 at approximately 0907hrs, CENCOM advised of a non-injury collision in the area of the Agate Pass Bridge. The vehicle was described as a green ford focus and the driver was out of his car.

I arrived at approximately 0915hrs along with a WSP Trooper who was passing by and Officer Miller, who arrived shortly after I did. Driver 1 was outside of his vehicle and said he had been driving South on SR305 and looked down at his phone. When he looked back up traffic had stopped in front of him. Instead of hitting the vehicle in front of him he veered to the right and struck the guardrail.

When checking Driver 1's driving status, it returned showing he needed to have an ignition interlock in the vehicle, but I could not see one in the vehicle. Off. Miller asked Driver 1 through field sobriety tests and handled the criminal citation of Driver 1 for driving without a ignition interlock device.

Driver 1 was warned for operating a hand held device while driving a vehicle.

Driver 1 said he would be responsible for the towing of his vehicle.
