

NARRATIVE

Vehicle 1 was backing from a parking stall slanted diagonally towards the northwest and turning sharply to the west as they backed out of the stall. As the driver of Vehicle 1 continued to back out of the stall, the witness observed the driver of Vehicle 1 scrape their passenger side front bumper against the driver side rear quarter panel of Vehicle 2. The witness stated that the driver of Vehicle 1 then hesitated, continued to back westward out of the stall, pulled forward eastward and bumped the curb adjacent to the rear passenger quarter panel of Vehicle 2 with their front driver side tire, and drove eastward out of the lot onto Madison Avenue North.
