

## NARRATIVE

At the date and time specified in this collision report, Vehicle 1 was traveling southbound on Miller Bay Rd NE across the intersection of Miller Bay Rd NE and NE New Brooklyn Rd. Vehicle 1 did not notice the cyclist that had already begun crossing the road from east to west via the crosswalk as Vehicle 1 moved forward, resulting in Vehicle 1 striking the back half of the bicycle with their front passenger side bumper. The collision knocked the cyclist over, resulting in the right ankle of the cyclist to be run over by the passenger side tires of the van. The witness mentioned in this report was able to confirm the above events when interviewed.

When asked what had happened, the driver of Vehicle 1 had mentioned that he did not see the cyclist and had attempted to hit the brake but had slipped and hit the gas instead, resulting in him running over and beyond the cyclist.
