

NARRATIVE

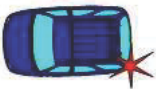

I was dispatched to a hit and run collision not in progress at Lower Fort Ward Park. The reporting party and victim requested a phone call and advised that while she was walking the park with her mother, her vehicle was hit by a tan 80's Volkswagen Van (license plate unknown). Victim advised she heard a loud bang and then the suspect vehicle pulling away, no driver could be identified. Photographs were sent and there appeared to be tan paint transfer and damage to the rear drivers side bumper and tail lamp. No suspect information.
