

NARRATIVE

On June 5, 2023, at approximately 1017 hours, officer was dispatched to the police department office to meet with a driver regarding a hit and run to his vehicle.

The driver reported that they believe their vehicle was hit sometime on May 20. They said on May 20th they parked their vehicle at the boat launch on Shannon Drive at around 1100 hours and went out on a friend's boat. They went back to their vehicle at around 1300 hours and continued to do errands around town.

At around 1715 hours, the driver said they were at home when a neighbor approached and asked what happened to the truck. They looked at the truck and realized it had been hit. They did not know when or where the damage occurred. They approached the vehicle from the front during the day of errands and had never realized it was damaged. They also mentioned it could have occurred on May 19 because of the way they park their vehicle in the driveway, the back end is not always observed.

The truck had sustained damage to the back bumper area, specifically on the passenger side of the vehicle.

Based on the information received, it seems that a collision did occur but it is unclear if it involved another vehicle or object.

Scene not observed
