

NARRATIVE

Both vehicles were traveling southbound on Madison Avenue when vehicle #1 -the lead vehicle - executed a sudden u-turn. The driver of #1, [REDACTED], told that he had not checked to his rear before executing the turn. Vehicle #2 struck the driver's door of #1. The damage to #2 appeared heaviest on the mid-right side of the van.

There were no complaints of injuries. Both parties received a driver's exchange form and were referred to their respective insurers.

The vehicles were retained by owners but vehicle #1 had a non-impound tow by Kitsap Tow which is the origin of the form. Amazon contracted a private tow firm for their vehicle.
