

NARRATIVE

Vehicle #1 was northbound on state route 305. As vehicle number one approached the intersection of Day Road and 305 he failed to recognize that the light was red for northbound traffic. He entered the intersection and struck vehicle #2, who was in the process of turning left onto eastbound Day Road. Damages to the vehicles, front passenger side damage of the truck on #1 and passenger side rear door damage to vehicle #2, were consistent with the fact set given. Both drivers exchanged information prior to my arrival and were given the case number to this incident and referred to their insurance companies.

Driver of vehicle #1 is the at fault/causing driver of this accident. If driver #1 had stopped at the red light for northbound traffic on 305 at Day Road this event would have been avoided.
