

NARRATIVE

Vehicle #2 was in the intersection of Wyatt Way and Grow Ave. Vehicle #1 entered the intersection and collided with the driver's door of #2. The front driver's side light was the initial point of contact and the damage carried across the front of the car. Placement of damage and damage striations indicated that vehicle #2 was deep in the intersection at the moment of impact.

Both vehicles moved out of the intersection prior to my arrival. Both drivers were given the case number to this incident and were referred to their respective insurance carriers.

As of this report the witness has not returned my call.
